Calibration Test Pump LPP 30, pneumatic operated to generate pressure up to +35 bar / +500 PSI switchable to generate vacuum up to -0.95 bar / -28 inHg

LR-Calibration Test Pump LPP 30 (pneumatic) Pressure-/Vacuum-generation -28 in Hg...+500 psi

The Calibration Test Pump LPP 30 is used to generate pressures and vacuum for checking, adjusting and calibrating mechanical and electronic pressure measuring instruments by comparative measurements. These pressure tests may be carried out in laboratories, workshop or on site at the measuring point. If the instrument under test and a sufficiently accurate reference measuring instrument (e.g. Electronic Pressure Calibrator LPC 300 or LPC 200, ±0.025% FS) are connected to the LPP 30, the same pressure / vacuum is applied to the two instruments when the pump is operated.

Despite its compact dimensions, the calibration test pump LPP 30 is easy to operate and allows for exact generation of the required test pressures. A changeover switch enables the generation of vacuum as well. The LPP 30 is fitted with a fine adjustment valve for the precise adjustment of pressures. The reference instrument is screwed directly on to the top of the pump and the unit under test is connected by means of a connection tube incorporating an adapter 1/4" BSP rotating female (or 1/4" NPT female) port.

Specification:

Pressure generation: 0...35 bar = 0...500 PSI (or equivalent), switchable to Vacuum generation: 0...-0,95 bar = 0...-28 inHG (or equivalent) 1/2" BSP female rotating (with seal) for reference instrument on the top of the pump Pressure ports: (Type LPP-30-N14: 1/4" NPT female, type LPP-30-G14: 1/4" BSP female rotating) 1/4" BSP female for unit under test (at connection tube) (Type LPP-30-N14: 1/4" NPT female) Volume per stroke: appr. 11 cm³ anodized aluminum, brass, ABS Materials: Fine adjustment: Fine adjustment valve Dimension: appr. 220 x 105 x 63 mm Weight: appr. 510 g

Included in standard supply:

- Calibration test pump LPP 30
- Connection tube with 1/4" BSP female rotating port
- Operating manual

Optional accessories:

- Set of adapters and seals for unit under test
- Rigid plastic case with foams

Recommended Reference Instruments:

- Accuracy ±0.025% FS:
- Accuracy up to ±0.025% FS:
- Accuracy ±0.050% FS:
- Accuracy ±0.1% FS:
- Accuracy ±0.2% FS:
- Accuracy ±0.25% FS:
- Accuracy ±0.5% FS:
- Accuracy ±1.0% FS:

NOTES:

To mount the reference instruments

· LPC 300 - LPC 200 - TLDMM - TLDMM-A01 - TLDMM-A02 - TDMC - LPP-MANO you do not need any adapter if you use the calibration handpump type LPP-30.
